

What is its purpose?

The TA.0753.3000 / TA.0464.3000 are designed to be combined with industrial vacuum cleaners that collect large quantities of material. The lifting bracket together with its matching ring are mounted on the collection container and can lift containers from 100 to 160 liters

Benefits

The lifting bracket is an essential accessory and user friendly accessory for the easy emptying of the container of the vacuum cleaner, making it possible to collect larger volumes while guarantying safety for the operator.
